USE RESTRICTIONS

- Do not apply **Arsenal® Power** within the root zone of desirable vegetation.
- Avoid spray drift onto desirable vegetation, by using appropriate low-pressure nozzles and the addition of anti-drift agents.
- Only use **Arsenal® Power** in industrial type municipal areas and then when the above mentioned precautions are met.

DIRECTIONS FOR USE:

USE ONLY AS DIRECTED

General information:

- **Arsenal® Power** is a broad-spectrum, non-selective herbicide, for the control of annual and perennial grasses, broadleaf weeds and sedges.
- **Arsenal® Power** possesses both pre-emergent and post-emergent activity, but is most effective when applied post-emergent to actively growing plants.

- **Arsenal® Power** is readily absorbed through the foliage and roots and is rapidly translocated to the meristematic regions, where it kills the plant.
- Rain, two hours after application, will not reduce efficacy.
- Plant growth is arrested shortly after application, but kill of the treated plants is slow, especially under dry conditions, where complete kill could take several months.
- The residual action of **Arsenal® Power** is related to the susceptibility of weed species, soil moisture and dosage applied. It should vary from three months (under wet conditions), to more than nine months (under dry conditions).

Compatibility:

Arsenal® Power may be used in a tank mix with an anti-drift agent. **Arsenal® Power** is also compatible with diuron, proprop and glyphosate. When **Arsenal® Power** is used in conjunction with any other agrochemical, full cognisance must be taken of all **WARNINGS, PRECAUTIONS** and **DIRECTIONS FOR USE** mentioned on those labels.

Mixing instructions:

Three-quarter fill the spray tank with clean water. Shake the **Arsenal® Power** container well and measure the required volume and pre-mix this with at least 10 ℓ water before adding to the spray tank. If any other product is to be mixed with **Arsenal® Power** (e.g. glyphosate), pre-mix the required volume of product in similar fashion. Fill the spray tank with water to the required level, while maintaining agitation, to ensure thorough mixing. The prepared spray mixture must not be left in the spray tank for any length of time, e.g. overnight.

GEBRUIKSBEPERKINGS

- Moenie **Arsenal® Power** binne die wortelgebied van gewenste plantegroei toedien nie.
- Om die risiko van sproeinewel op nie-teikenplante te verlaag, gebruik toepaslike lae-druk spuitneuse, veral wanneer **Arsenal® Power** in sensitiewe areas gespuit word.
- Gebruik **Arsenal® Power** slegs in industriële-tipe munisipale areas en dan net wanneer bogenoemde voorsorgmaatreëls getref is.

Algemene inligting:

- **Arsenal® Power** is 'n breëspektrum, nie-selektiewe-onkruidodder, vir die beheer van een- en meerjarige grasse, breëblaaronkruid en uittjiesoorte.
- **Arsenal® Power** is doeltreffend by beide voor-opkoms- en na-opkomsbehandelings, maar is meestal effektief as 'n na-opkomsbehandeling op aktiefgroeiende plante.
- **Arsenal® Power** word maklik deur die blare en wortels opgeneem en word dan spoedig na die groeipunte getranslokeer, waar dit die plant doodmaak.
- Reënval, twee ure na toediening, behoort geen effek uit te oefen op die werking van die produk nie.
- Groei van plante staak kort na toediening, maar uiteindelijke afsterwe van behandelde plante vind stadig plaas, veral tydens droë toestande, wanneer totale beheer verskeie maande mag duur.
- Die nablywende werking van **Arsenal® Power** word geaffekteer deur die vatbaarheid van die betrokke onkruidsoort, gebruikshoeveelheid en grondvog. Dit sal wissel van drie maande (onder nat toestande), tot meer as nege maande (onder droë toestande).

Verenigbaarheid:

Arsenal® Power mag as 'n tenkmengsel gebruik word met 'n middel wat spuitstofwegdrywing verminder. **Arsenal® Power** is ook verenigbaar met diuron, proprop en glifosaat. Wanneer **Arsenal® Power** met enige ander landbouchemikalië gemeng word, moet alle **WAARSKUWINGS, VOORSORGMATREËLS** en **GEBRUIKSAANWYSINGS** wat op daardie etikette verskyn, deeglik nagekom word.

Menginstruksies:

Vul die spuittenk driekwart vol met skoon water. Skud die **Arsenal® Power** houër voor gebruik. Meet die benodigde volume **Arsenal® Power** af en meng dit vooraf met minstens 10 ℓ water, voordat dit by die tenk gevoeg word. Indien enige ander produk (bv. glifosaat), met **Arsenal® Power** gemeng word moet die benodigde volume van hierdie produk vooraf eers afgemete en in die water gevoeg word en dan die **Arsenal® Power**. Vul die tenk verder met water tot by die verlangde volume, terwyl voortdurend geroer word om goeie vermenging te verseker. Aangemaakte spuitmengsels moenie in die spuittenk gelaat word vir 'n onbepaalde tyd, bv. oornag, nie.
