RESISTANCE WARNING

For resistance management, REVYCARE® is a Group Codes 3 & 11 fungicide. Any fungal population may contain individuals naturally resistant to REVYCARE® and other Group Codes 3 & 11 fungicides. The resistant individuals can eventually dominate the fungal population if these fungicides are used repeatedly and exclusively in programs. These resistant fungi may not be controlled by REVYCARE® or any other Group Codes 3 & 11 fungicides.

To delay fungicide resistance:

- **Avoid exclusive repeated use of fungicides from the same Fungicide Group Codes. Alternate or tank mix with registered products from different Fungicide Group Codes.**
- **For tank mixing or alternation with products in unrelated Fungicide Group Codes, refer to the applicable individual product labels.**
- **Integrate other control methods (chemical, cultural, biological) into disease control programmes.**

FOR SPECIFIC INFORMATION ON RESISTANCE MANAGEMENT, CONTACT THE REGISTRATION HOLDER, BASF SOUTH AFRICA (PTY) LTD.

DIRECTIONS FOR USE: USE ONLY AS DIRECTED

Mixing instructions:
Measure the required volume of **REVYCARE®** and pre-mix in at least 10 ℓ of water before adding to the spray tank. Fill the spray tank with water to the final volume required while maintaining agitation to ensure thorough mixing of the spray mixture before spraying commences. Maintain agitation while spraying. Prepared spray mixture must not be left in the spray tank for any length of time, e.g. overnight.

CITRUS:

- Apply **REVYCARE®** as part of a preventive spray programme.
- The application of **REVYCARE®** should follow the application of a multisite contact fungicide registered for citrus black spot control applied at 100% petal drop at the registered rate to ensure protection for at least 21 days.
- Thereafter, apply three applications of **REVYCARE®** beginning 21 days later, followed by two applications as recommended in the table below.
- Refer to the respective multisite contact fungicide product label for recommendations regarding dosage rate and directions for use.
- Do not apply **REVYCARE®** to old neglected citrus trees, as the risk of developing QoI resistance on these trees is extremely high.

- **Lemons: All out-of-season fruit must be removed from the trees before starting the spray programme.**

All spray applications must be made with suitable equipment that is in good working order and correctly calibrated to give the desired coverage for that method of application.

Behandeling: Behandel simptomaties (reinig, belangrikste funksies). Daar is geen spesifieke teenmiddel nie.

WAARSKUWING TEEN WEERSTAND

REVYCARE® is ‘n FRAC Groepkodes 3 en 11 swamdoder. Enige populasie van ‘n spesifieke swam mag individue insluit, wat ‘n natuurlike weerstand teen REVYCARE® of enige ander Groepkodes 3 en 11 swamdoders het. Indien hierdie swamdoders in herhaaldelike en eksklusiewe programme aangewend word, kan die weerstandige individue uiteindelik die swampopulasie oorheers. Hierdie weerstandige swamme sal waarskynlik nie deur REVYCARE®, of enige ander Groepkodes 3 en 11 swamdoders, beheer word nie.

Om weerstand teen swamdoders te vertraag:
- **Vermy die eksklusiewe herhaaldelike gebruik van swamdoders in dieselfde Swamdodergroepkode. Wissel af met, of gebruik tenkmengels van produkte in verskillende Swamdodergroepkodes.**
- **Sien toepaslike individuele produketikette wanneer daar afgewissel word, of tenkmengsels gebruik word, met produkte in ander Swamdodergroepkodes.**
- **Integreer ander beheermaatreëls (chemies, verbouing, biologies) in swamdoderprogramme.**

VIR SPESIFIEKE INLIGTING OOR WEERSTANDSBESTUUR, KONTAK DIE REGISTRASIEHOUER, BASF SA (Edms) Bpk.

GEBRUIKSAANWYSINGS: GEBRUIK SLEGS SOOS VOORGESKRYF

Menginstruksies:
Meet die verlangde hoeveelheid **REVYCARE®** af en meng dit eers met ten minste 10 ℓ water voordat dit in die spuittenk bygevoeg word. Vul die tenk met water tot by die verlangde vlak terwyl die mengsel voortdurend geroer word, om deeglike vermenging te verseker, alvorens daar met toediening begin word. Hou aan om die mengsel tydens toediening te roer. Aangemaakte spuitmengsels moenie vir ‘n onbepaalde tyd, bv. oornag, in die spuittenk gelaat word nie.

SITRUS:
- Dien **REVYCARE®** toe as deel van ‘n voorkomende spuitprogram.
- Die toediening van **REVYCARE®** moet volg op die toediening van ‘n multiteiken-kontakswamdoder, wat vir die beheer van sitrusswartvlek geregistreer is, en wat teen die geregistreerde dosis op 100% blomblaarval toegedien is om beskerming vir minstens 21 dae te bied.
- 21 dae na die blomblaarval-toediening word die eerste **REVYCARE®-**toediening gedoen, opgevolg deur 2 verdere **REVYCARE®** toedienings soos aangedui in die tabel hieronder.

- Verwys na die bepaalde multiteiken-kontakswamdoder se produketiket vir aanbevelings rakende dosis en gebruiksaanwysings.
- Moenie **REVYCARE®** op ou verwaarloosde sitrusbome spuit nie, aangesien die risiko van die ontwikkeling van QoI-weerstand by hierdie bome uiters hoog is.
- **Suurlemoene: Alle buiteseisoen-vrugte moet van die bome verwyder word, voordat met die spuitprogram begin word.**

Geskikte spuittoerusting, wat in goeie werkende toestand is en korrek gekalibreer is, moet tydens alle toedienings gebruik word, om die verlangde bedekking met dié spesifieke toedieningsmetode te kry.

GEWAS	SIEKTE	DOSIS	GEBRUIKSAANWYSINGS
SITRUS	Sitrusswartvlek (*Phyllosticta citricarpa*)	12 mℓ **REVYCARE®** / 100 ℓ water	Dien as 'n voldekbespuiting toe om goeie bedekking van alle vrugte te verseker. Dien **REVYCARE®** as deel van 'n voorkomende spuitprogram toe. Dien 'n multiteiken-kontakswamdoder, wat vir die beheer van sitrusswartvlek geregistreer is, by 100% blomblaarval toe en volg dit 21 dae later met die eerste **REVYCARE® -**toediening op. Dien daarna 'n verdere twee **REVYCARE®** -toedienings toe teen intervalle van 42 dae. Dien 'n maksimum van 3 **REVYCARE®** -toedienings per seisoen toe. Verwys altyd na die **GEBRUIKSAANWYSINGS** vir **SITRUS** op die relevante produketikette wat in die spuitprogram gebruik word.
