RESISTANCE WARNING

Generally considered as a low risk group, without signs of resistance developing fungicides. No cross resistance occur between group members M1 – M9. Kumulus® WG is a FRAC Group Code M2 fungicide, for resistance management. Any fungal population may contain individuals naturally resistant to Kumulus® WG and other Group Codes M1 – M9 fungicides. The resistant individuals can eventually dominate the fungal population if these fungicides are used repeatedly and exclusively in programmes. These resistant fungi may not be controlled by Kumulus® WG or any other Group Codes M1 – M9 fungicides.

To delay fungicide resistance:
- **Avoid exclusive repeated use of fungicides from the same Fungicide Group Code. Alternate or tank-mix with products from different Fungicide Group Codes.**
- **For tank mixing or alternation with products in other Fungicide Group Codes, refer to applicable individual product labels.**
- **Integrate other control methods (chemical, cultural, biological), into disease control programmes.**

FOR SPECIFIC INFORMATION ON RESISTANCE MANAGEMENT, CONTACT THE REGISTRATION HOLDER, BASF SA (Pty) Ltd.

WAARSKUWING TEEN WEERSTAND

Swamdoders M1 – M9, word beskou as 'n lae risiko groep, met geen tekens van weerstand wat ontwikkel teen ander swamdoders nie. Geen kruisweerstand is aangemeld tussen die swamdoders in hierdie groepe nie. Kumulus® is 'n FRAC Groepkode M2 swamdoder. Enige populasie van 'n spesifieke swam mag individue insluit wat 'n natuurlike weerstand teen Kumulus®, of enige ander Groepkodes M1 – M9 swamdoders het. Indien hierdie swamdoders in herhaaldelike en eksklusiewe programme aangewend word, kan die weerstandbiedende individue uiteindelik die swampopulasie oorheers. Hierdie weerstandbiedende swamme sal waarskynlik nie deur Kumulus® of enige ander Groepkodes M1 – M9 swamdoders, beheer word nie.

Om weerstand teen swamdoders te vertraag:

- **Vermy die eksklusiewe herhaaldelike gebruik van swamdoders in dieselfde Swamdodergroepkode. Wissel af met, of gebruik tenkmengels van produkte in verskillende Swamdodergroepkodes.**
- **Sien toepaslike individuele produketikette wanneer daar afgewissel word, of tenkmengsels gebruik word, met produkte in ander Swamdodergroepkodes.**
- **Integreer ander beheermaatreëls (chemies, verbouing, biologies), in swamdoderprogramme.**
